15 Green Meeting

Please remember that the Festspielhaus/Kongresshaus is a Green Meeting house and that we should adhere to their standards. We at Luger Research e.U. and Luger GmbH strive to protect the environment by following the Green Meeting recommendations and ask that our exhibitors keep the following recommendations in mind:

- Use reusable or recyclable materials.
- Use exclusively PVC-free materials.
- Use energy-saving lighting systems (LED systems, energy-saving lamps, automatic time and daylight control etc.).
- Avoid mass distribution of flyers or other printed matter, hand out printed matter only upon request or give preference to electronic information transfer (e.g. indicate links for download etc.).
- Use 100% recycling paper or at least paper bleached completely without the use of chlorine (TFC) for the required printed matter, or commission an environmentally certified printing company with the printing job according to the guidelines of the Austrian Eco-label.
- Dispose of your waste in the waste separation systems offered, according to the requirements of the event management.
- Do not offer giveaways. If this is not possible, use durable and/or reusable products made of environmentally sound materials (domestic wood, natural fibers) without synthetic individual packaging, without batteries, from fair trade, or with certified quality seals.
